Storm Water Program
Rose Creek Watershed Opportunities Project
Report for July 1, 2005 – September 30, 2005
(Submitted by September 30, 2005)

Project Status

Work conducted from July 1, 2005 through September 30, 2005 for the Rose Creek Watershed Opportunities Project was the completion of Dry Weather Monitoring for the last remaining 1 site for a total of 24 sites. Field screening and visual observation information was gathered and has not been compiled. The laboratory analytical results will not be received until October 2005. The next quarterly report will provide all data and analysis.
